

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investment Fund Services

IFSL Church House Tenax Multi-Asset Strategy Fund Class B Shares

A Sub-fund of the IFSL CH Special Mandates Fund (ISIN Income GB00BNGY2T93, Accumulation GB00B28KSK12)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase the value of an investment over a minimum of 5 years through a combination of capital growth, which is profit on investments held, and income received by the Fund, which is money paid out of investments, such as dividends from shares and interest from bonds.

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell and when.

The Fund will have exposure to a broad range of asset classes across different industries and geographical regions, however not all asset classes will always be held:

- At least 45% in investment grade bonds (which are loans typically issued by companies and governments) and money market instruments (which are short-term loans). Investment grade bonds are where the issuer has a high and reliable capacity to repay the debt. The Fund may also have exposure to sub-investment grade bonds, which can be more vulnerable to changing market conditions but typically pay a higher rate of interest.
- Up to 35% in shares of companies. This may include convertible securities (which are bonds that can convert into shares), and investment trusts.
- Up to 10% may be invested in collective investment schemes, exchange traded funds, and exchange traded commodities (collectively "Investment Funds"). These could include other Investment Funds managed by the Authorised Corporate Director, the Investment Manager or one of their associates.

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio or in pursuit of the Fund's investment objective.

The Fund does not invest in derivatives (which are instruments whose returns are linked to another asset, market or other variable factor). However other funds purchased may have the ability to use derivatives to varying degrees.

The Investment Manager, within the limits of the investment policy, aims to create a blend of investments that together increase in value over time. It is expected this blend of investments will result in low levels of volatility, up to 5% per annum. There is no guarantee that the Fund will always have this low level of volatility, as chosen investments are based on predicted volatility in normal market conditions.

The Fund may hold high proportions in cash and other lower-risk assets such as near cash, money market instruments and deposits.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund's Investment Policy puts it in the IA Mixed Investment 0-35% Shares sector.

The Fund is not managed to a benchmark, however you may want to assess the Fund's performance compared to the performance of this sector. This comparator has been chosen as it represents other funds with a similar asset allocation.

If you invest in income shares, income from investments in the fund will be paid to you. If you invest in accumulation shares, income will be added to the value of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 3 because its investments have experienced low to moderate volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a

smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund will be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

Bonds known as 'sub-investment grade' bonds generally produce a higher level of income, but carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 30/09/2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 8 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.93%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Historic performance to 31 December 2024

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 22 November 2007.

This share class was launched on 22 November 2007.

On 24 August 2020 the Fund converted from a NURS to a UCITS.

As at 28 March 2025, the Fund changed its investment objective and policy, and introduced a new performance comparator. Past performance is now shown against this new comparator. For more information about these changes, please contact us.

Benchmark: IA Mixed Investment 0-35% Shares.
